

## ACTEOS TMS > Transport Optimization and Management System

Acteos TMS is a complete and modular solution to organize and manage your transport activity. Acteos TMS provides multi-level answers (tactical, operational and strategic) to your team to reduce costs and increase efficiency. It was thought for all those who purchase transportation including loaders with a dedicated fleet.»

### Acteos TMS : Master your activity and constraints

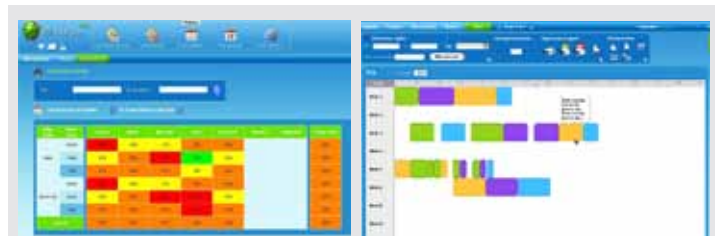

- ✓ Optimize transverse transport costs
- ✓ Reduce the duration of daily activities for all users by simplifying all steps
- ✓ Strengthen and systematize your relationship with your suppliers and carriers
- ✓ Improve the timeliness and track your deliveries
- ✓ Accelerate strategic decisions using simulation
- ✓ Reduce and plot transport incidents (claims, damages)
- ✓ Mastery of time and transport costs
- ✓ Improvement and control your Internal and external quality of service (QOS)
- ✓ Managing multiple sites and multiple companies, upstream and downstream flows, local and international

### Acteos TMS: the strengths

- A quick return on investment
- Intuitive ergonomics
- Support to decision making
- Extensive functional coverage
- A collaborative approach through the Web portal : Acteos Portal
- A green-supply chain solution

STRATEGIC TRANSPORT	
<i>simulation, dashboard, BI...</i>	
PROJECTED	ACTUAL
<i>planification, chartering optimization, tracking...</i>	<i>administrative management, preinvoicing, cost management...</i>

### Acteos TMS new functions

- Collaborative portal for carriers, customers and suppliers
- Fast and intuitive chartering (drag & drop new ergonomics)
- Carbon footprint, advanced diesel indexing
- Administrative workflow

### ACTEOS TMS NEW FUNCTIONS

#### Logistic and costs simulation

With Acteos TMS, you can measure the potential impact of your decisions (carriers change, rates, network organization) on your transport budget.

- × Identification of the most interesting providers in terms of costs and delays ;
- × Visualization of the effects / editing customizable reports ;
- × Help negotiating with carriers.

A precious help in strategic decisions.

- × Simulate changes in logistic organization (volume evolution, creation / deletion of platforms, network modification ...) ;
- × Validate the best logistic organization ;
- × Customizable reports to support decisions.

## ACTEOS TMS > Transport Optimization and Management System

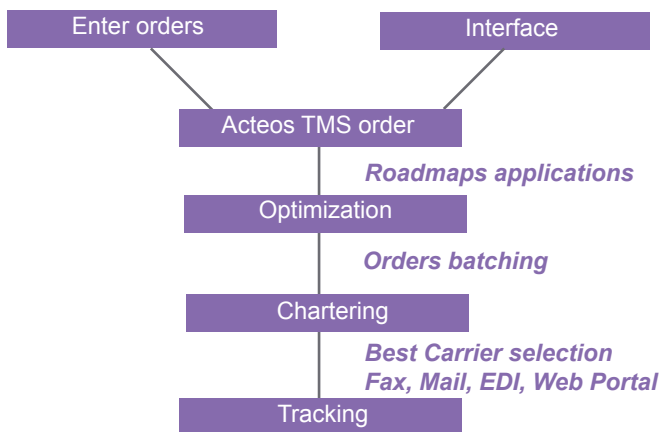

### Tour optimization and transport planning

Acteos TMS is based on a brain new optimization engine, more efficient, more flexible that takes in account all the business constraints..

- × Automatic creation of tours (optimizing costs,distance and time) ;
- × Consideration of contracts rules and priorities ;
- × Automatic construction of consolidated expeditions ;
- × Graphical display of routes and roadmaps.

### Chartering

#### Planning Workflow Acteos TMS

List of the steps to manage transport plan from raw orders to the tracking of validated tours.

Acteos TMS provides you all required tools to dispatch efficiently your transport needs among your providers. It also takes in account contracts and ressources availability.

- × Manual or automatic Chartering ;
- × Chartering creation ;
- × Best Carrier selection taking in account their price (rate database), Service level, and green impact ;
- × Transport orders can be validated through fax, mail, EDI or Web portal ;
- × Drivers reception and loading appointments check ;
- × Simplified end user Interface, ergonomical (drag & Drop) manual chartering ;
- × Freight auction.

### Tracking

- × Real time follow-up of active tours ;
- × Tour Progression display on the web portal (for senders, recipients, contractors).

### Quality of service

Acteos TMS brings you smart tools to measure accurately the QOS of your carriers and service providers.

- × Quality of service management for transport providers (punctuality, incidents, claims) ;
- × Mitigating actions, related costs and follow up for every claim ;
- × QOS Statistics.

### Pre-invoicing / invoicing

- × Complex rate and rules management (fixed price, variable costs, complementary fees...) ;
- × Takes in account grouping rules and roadmaps;
- × Pre-invoice edition, automatic control of carriers'invoices, invoices manual check through the web portal ;
- × Data interfaces with external accounting systems and ERPs (provisions, breakdown, allocation) ;
- × Transactions logs follow up.

### Administrative management

Acteos TMS helps you to measure and analyse your key figures.

- × Statistics engine included ;
- × Transport costs breakdown engine ;
- × Internal query analyser and designer ;
- × Dashboards, transport and SCM KPI ;
- × Exports to Excel, Maps, PDF, connection to BI software.
